

2026 | COOLING DEPOT PROFESSIONAL PROGRAM

CDP by **Cooling**[™]
DEPOT
cooling depot professional

Enjoy Success

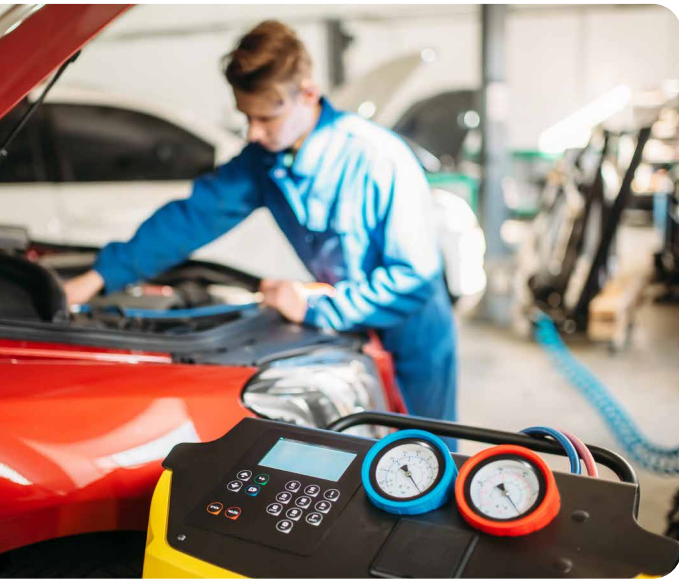

FOCUS ON AIR CONDITIONING TO HEAT UP YOUR SALES

In today's marketplace, most vehicles are equipped with temperature control systems, creating a need for maintenance and repair year round. A proven way to capitalize on this growth opportunity is to rely on the advantages of the Cooling Depot™ brand for premium parts. Every time. Every season.

The Cooling Depot Professional (CDP) program continues to deliver performance for 2026. The strategic focus of the program is to capture the essence of what the Cooling Depot™ brand is all about; integrity, quality, reliability, peace of mind and trust.

Everything you need to enjoy a new degree of success | **The Cooling Depot™ Professional Program**

The Cooling Depot™ program provides an established, trusted brand; premium quality products; over 17,000 skus (the largest coverage of import and domestic applications in Canada); pricing incentives; and all the business tools you need to position yourself as the temperature control professional in your market.

Whether you're providing advice on cooling system maintenance or installing premium products, the Cooling Depot™ program and brand will strengthen your relationship with the customer.

As a Cooling Depot™ Professional, you will benefit from program support, and our product and marketing expertise which will assist you in capitalizing on the growth opportunities for cooling system maintenance and service.

Counterperson training will be provided to support the enhanced Cooling Depot™ inventory as well as focused sales calls to your key Service Provider customers. CDP program benefits will be implemented to support and focus store staff on the advantages of selling Cooling Depot™ temperature control products.

Roll-Over Program

IMPROVE CASH FLOW AS A COOLING DEPOT™ PROFESSIONAL

- **Benefit From Our Roll-Over Program**

Uni-Select will issue a Roll-Over payment of 25% of the value of your initial pre-season order which will be credited in November 2026 and re-billed in two equal payments in March and April 2027.

- **Special Terms Will be Provided**

Applied to the pre-season booking order (please review with your Blue Streak Territory Manager or FSP for details).

- Order the inventory you need now, while maximizing your cash flow at the same time. Take advantage of the Roll-Over Program available exclusively to Cooling Depot™ Professionals.

Place your pre-season order for Cooling Depot™ product by April 30, 2026 (minimum order of \$2,500 at WD Net required).

- Your Cooling Depot™ initial order will be shipped to your location
- Orders must be placed by April 30, 2026 to receive special terms

Qualifying CDP orders received by March 31, 2026 will receive a 5% discount. CDP orders may include all part numbers from the 2026 Uni-Select Spring Booking program. The 5% discount will not apply on CDP orders received after March 31, 2026.

As both a CDP and VCX member, special terms will be applied on the initial number order (WD Net).

To qualify for terms you must place an order for both VCX and CDP programs and submit the orders at the same time.

CDP – minimum order of \$2,500 at WD Net required / minimum \$4,000 at WD Net required for Guaranteed Sale

VCX – minimum order of \$2,500 at WD Net required / minimum \$6,000 at WD Net required for Guaranteed Sale

\$10,000 and under - four equal payments

\$25,001 to \$35,000 - two no / three equal

\$10,001 to \$25,000 - one no / three equal

\$35,001 and over - three no / three equal

- All initial orders will be processed as ship and cancel. Please allow 2-3 weeks for delivery.
- After the initial new number order, as a CDP member, you will receive special freight prepay of \$1,500 (WD Net) through to December 31, 2026.

Guaranteed Sale Program

IMPROVE CASH FLOW AS A COOLING DEPOT™ PROFESSIONAL

Being a CDP Member has Its Advantages. With an initial order of \$4,000 you have access to the Guaranteed Sale Program.

Order product with confidence and peace of mind. As a Cooling Depot Professional you can take advantage of our Guaranteed Sale Program with Inventory Management.

Qualifying CDP orders received by March 31, 2026 will receive a 5% discount. CDP orders may include all part numbers from the 2026 Uni-Select Spring Booking program. The 5% discount will not apply on CDP orders received after March 31, 2026.

- With a minimum order of \$4,000 at WD Net, the CDP program will provide a Guaranteed Sale on all new part numbers shipped.
- Guaranteed Sale program is valid for 18 months and Blue Streak® will accept a return of any product that has not sold once during this period with an accompanying offsetting order.
- Blue Streak drop ship the initial new number order to your location (minimum order of \$4,000 at WD Net required). All initial orders will be processed as **ship** and **cancel**. Please allow 2-3 weeks for delivery.

CDP – minimum order of \$2,500 at WD Net required / minimum \$4,000 at WD Net required for Guaranteed Sale

VCX – minimum order of \$2,500 at WD Net required / minimum \$6,000 at WD Net required for Guaranteed Sale

\$10,000 and under - four equal payments

\$25,001 to \$35,000 - two no / three equal

\$10,001 to \$25,000 - one no / three equal

\$35,001 and over - three no / three equal

- As both a CDP and VCX member, special terms will be applied on the initial number order (WD Net). To qualify for terms you must place an order for both VCX and CDP programs and submit the orders at the same time.
- After the initial new number order, as a CDP member, you will receive special freight prepay of \$1,500 (WD Net) through to December 31, 2026.
- As a CDP member, you will not be billed the 4% emergency order fee from Blue Streak through to December 31, 2026 (line codes 111 & 246).
- All qualifying CDP Guaranteed Sales program orders must be received no later than April 30, 2026.

Complete A/C System Benefits

SAVE WITH PRICING ENHANCEMENTS

Cooling Depot™ provides new pricing benefits for 2026.

Each initiative is designed to leverage your competitive edge and help you realize the sales growth potential of your business.

- **Special Freight** for being a Cooling Depot™ Professional member. You will receive special prepaid freight of \$1,500 (WD Net) on all Cooling Depot™ orders through to December 31, 2026.
- **4% Surcharge Fee Waived** on emergency orders, through to December 31, 2026 as a Cooling Depot™ Professional member (line codes 111 & 246)

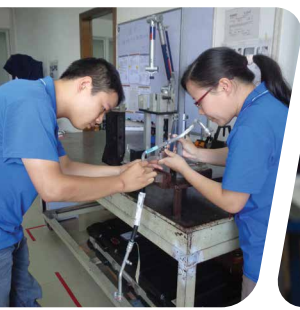

Don't risk your reputation and profitability by replacing just the compressor.

- Replace the accumulator or filter drier
- Replace the orifice tube or service the expansion valve
- Flush the A/C system with a flush solvent designed for automotive air conditioning
- Add the correct amount of compressor oil

Quality Products. Coverage Leader.

HOSE ASSEMBLIES

Quality

Cooling Depot™ hose assemblies are manufactured with experienced engineering, precise machining and custom tooling to ensure each component of the assembly meets or exceeds OE fit, form & function.

- 100% inspected to ensure pipe bend accuracy and consistency is maintained through highly precise CNC equipment
- All hoses are constructed with double wall barrier hose and are compatible with all automotive refrigerants including YF
- Secure crimp connections through custom tooling fixtures
- All hose assemblies are helium tested to ensure long lasting, leak-free performance

Coverage

Cooling Depot™ continues to provide expanded coverage for domestic, import, hybrid/electric and medium duty applications.

- All hose assemblies contain gaskets, O-rings, or seals for proper installation
- OE specific application design

Unique Sales Opportunity

Did You Know? Following a catastrophic compressor failure, the hose assembly should be considered as part of the replacement due to the following:

- Hose assemblies with an in-line filter or muffler cannot be flushed and must be replaced
- Hoses should be inspected internally and externally for cracks, barrier softness and loose or embedded particles
- Over time, loss of elasticity may cause small leaks at hose crimp resulting in low refrigerant charge, starving the compressor of lubrication leading to compressor failure

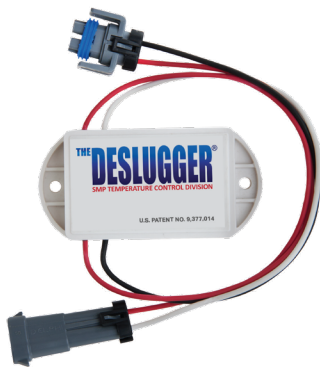

Problem Solving Parts - PSP

DRIVE SALES WITH COOLING DEPOT™

Problem Solving Solutions

The Cooling Depot™ line of Problem Solving Parts are products designed to help save time and money for the counterperson and technician. Our product research and development team work together to provide solutions to OE products with known flaws and deficiencies, while our Product Specialists continuously research the market to find new ideas on products that would be beneficial to our customers.

Extend compressor life by eliminating liquid “slugging”

Cooling Depot’s Deslugger solves this liquid “slugging” problem by pulsing the compressor clutch multiple times during initial engagement. By gradually engaging the compressor, trapped liquid is gently moved out, preventing catastrophic hydraulic damage. Once the brief deslugging function is complete, the compressor reverts to normal cycling operation until the system has been off again for more than 30 minutes.

Innovation on Your Side | The Advantages Of Our Blower Motors

Show Winter (and Summer) Who’s Boss.

Cooling Depot™ branded blower motors (blower/radiator fan) are supported with research and development, manufacturing and product performance testing. Our Canadian-based manufacturing facility is ISO14001 and TS16949 certified providing you with industry-leading coverage, including the latest vehicle applications.

Whether it’s a family road trip in the summer or a dash to the hockey rink in February, there’s peace of mind knowing that the temperature inside your customer’s vehicle is always comfortable. And with the performance of our blower and radiator fan motors, your customers can feel confident that those July days will be cooler and those memorable Canadian winters warmer.

Technological Advancements

THE BRUSHLESS ADVANTAGE

Brushless motors are generally more efficient than brushed motors because they have fewer moving parts and less friction. This leads to better performance and lower energy consumption, which is especially beneficial for the vehicle's overall power management.

Durability:

Without brushes that wear out over time, brushless motors typically have a longer lifespan and require less maintenance. This reliability is crucial for automotive applications where durability is a key factor. All Cooling Depot™ motors are durability tested to strict quality standards for enhanced longevity and performance.

Noise and Vibration:

Brushless motors operate more smoothly and quietly compared to brushed motors. This results in a quieter cabin environment, contributing to overall passenger comfort. Cooling Depot™ motors must meet all OE specifications for noise and rotational balance prior to approval by our engineering and production teams.

Performance:

Brushless motors offer better torque control and can operate at higher speeds without losing efficiency. This translates to better performance in controlling the blower speed and airflow. Cooling Depot™ brushless motors are built and tested to OE performance specifications while other aftermarket motors lack crucial performance factors due to shortcuts taken to cut costs in manufacturing. These shortcuts lead to motors that do not match the speed, control and efficiency when compared to the OE.

Electric vehicle brushless blower motors are not only used for cabin cooling but also battery cooling. Their efficiency helps maximize the range and performance of electric vehicles. Brushless motors may also be found in other automotive systems where precise and efficient motor control is needed, such as seat ventilation systems and some active aerodynamic components.

As automotive technology evolves, brushless blower motors are expected to become more prevalent due to their efficiency and reliability. Advances in motor control technology and integration with vehicle electronics will likely continue to enhance their performance and capabilities. Cooling Depot™, your complete HVAC source will continue to lead the aftermarket in motor applications for today's vehicles and the vehicles of the future.

Earn a Gift Card

iPOINTS COUNTERPERSON SALES PROMOTION

In 2026, we continue with the exciting rewards program for the CDP participating counterperson. All they have to do is record each sale on the iPoints website every time they sell Cooling Depot™ branded product to earn cash. At the end of the promotional period, their total dollar amount will be added up. This total dollar amount will then be redeemed for a gift card† from either Home Depot, Best Buy, Winners/HomeSense/Marshalls, Air Canada®* or President's Choice.

And did you know? In 2025, over 600 Cooling Depot™ Professionals took advantage of the iPoints program—turning their sales into exclusive rewards.

The Spring promotion will begin on May 1 and lasts through to July 31, 2026. The Fall blower motor program starts October 1 and continues to December 31, 2026.

Are you in for 2026?

Some restrictions may apply. Contact your Blue Streak Territory Manager for details. †All gift cards will be distributed digitally ONLY.

*Air Canada® and the Air Canada logo are registered trademarks of Air Canada®, used by Blue Streak-Hygrade Motor Products under authorization.

eSTREAK COMMUNICATIONS

If you have a passion to learn and be up to date on the advanced technology of temperature control products, then eStreak is for you.

It's a program that's designed to expand your knowledge as a dedicated Cooling Depot™ professional. Whether it's import or domestic vehicles, eStreak delivers to your 'inbox' information to help drive sales for business growth.

For 2026, some of the planned topics include A/C Service Kits, Compressor Testing, Hybrid/EV applications and more. Accelerate your business with the knowledge of eStreak and the power of the Cooling Depot™ brand.

NEW PRINTED MATERIALS

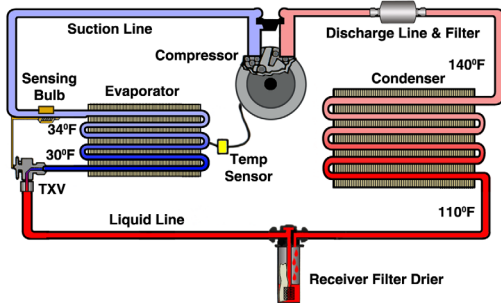

Flyers and brochures are created and distributed regularly to explain the features and benefits of Cooling Depot™ products.

Bundle up for a cold drive this summer

REPLACE MORE THAN JUST THE COMPRESSOR

WHY THIS IS SO IMPORTANT

It is imperative that you replace all the necessary components to ensure increased customer satisfaction and extended compressor life.

With the performance of an optimum operating air conditioning system, your customers can feel confident that those summer days will be cooler.

Doing A/C service requires more than just replacing the compressor

REPLACE THE ORIFICE TUBE

REASON TO REPLACE:

The orifice tube meters refrigerant flow through the system and also screens particles that may come through. The fine mesh screen or the internal components of the orifice tube can become plugged, restricting refrigerant and lubricant flow.

OR

REPLACE OR SERVICE THE EXPANSION VALVE

REASON TO REPLACE:

Expansion valves regulate refrigerant flow within the system. Other than the compressor, this is the only other moving part. Expansion valves can become contaminated with system debris and should be replaced.

REPLACE THE ACCUMULATOR /FILTER DRIER

REASON TO REPLACE:

Accumulator & filter driers keep moisture from permeating the system and minimizes deterioration of refrigerant and lubricant. It is essential to replace with the compressor to avoid compressor or system failure.

AND ADD THE CORRECT AMOUNT OF LUBRICANT

PROPER LUBRICATION:

For successful repair, only the recommended amount, type and viscosity of oil, and the appropriate refrigerant should be used. Use of oils containing dye, sealers or other additives that do not meet SAE J2670, may reduce compressor longevity, impact system performance and void your warranty.

For optimum air conditioning performance and to help extend the life of the compressor, the accumulator/filter drier and orifice tube/TXV valve must be replaced. It is strongly recommended that the A/C system be flushed with an approved solvent and the condenser be replaced on vehicles newer than 2001.

A/C Service Kits

INCREASE SALES AND PROFITABILITY

Cooling Depot™ A/C Service Kits are assembled and shipped in one convenient package with all of the components you need to accompany an A/C compressor* ensuring a successful repair. These service kits offer greater coverage with fewer SKUs allowing you to optimize your inventory.

Cooling Depot™ A/C Service Kits include all of the following premium components*:

- Accumulator or Receiver/Filter Drier
- Expansion Device(s)
- Proper Oil
- All Necessary Gaskets & O-Rings
- Service Valves & Caps
- Tamper Evident Strap & Underhood Label

Cooling Depot™ A/C Service Kit benefits:

- All components included meet or exceed OE performance
- Individual components conveniently packaged in a single box
- 500+ SKUs provide extensive vehicle application coverage
- Limited lifetime warranty†

* Compressor not included in A/C Service Kit.

Pair with either a new or reman compressor for a complete repair*

Convenience In A Box

Quality A/C Pac-Kits

- **NEW** Compressor
- Accumulator or Receiver/Filter Drier
- Expansion Device
- Orifice tube (where applicable)
- Oil
- All Necessary Gaskets and O-Rings
- Service Valves & Caps
- Limited lifetime warranty†

Cooling Depot™ PAC-Kits® are assembled and shipped in one convenient package with everything you need to perform a successful A/C compressor replacement.

Created from the top selling NEW compressors, PAC-Kits® provide over 1,100 SKUs that come with a limited lifetime warranty†.

† Limited lifetime warranty (for Light Duty Class 1-3 vehicles) to the original purchaser of the kit or its contents for the life of the vehicle with all components replaced and all SMPT compressor installation procedures followed. Limited Lifetime Warranty is not transferable to any other party and all warranty limitations set forth in the SMPT warranty statement apply. Prepackaged kits for Heavy Duty applications with all components replaced (Class 4-8 vehicles) and SMPT compressor installation procedures followed (labour excluded) provide a 3 year/483,000 kilometre warranty (whichever comes first) from date of purchase.

Cooling Depot™ PAC-Kits® include all of the components necessary to do a complete compressor replacement.

Evolving Technology

HYBRID AND EV COVERAGE

Hybrid and Electric vehicle registrations are growing rapidly and these vehicles feature more parts than traditional ICE vehicles. Our robust category management capabilities help make sure you have the right parts on the shelves for your market and can help reduce inventory duplication.

VEHICLE TECHNOLOGY IS CHANGING RAPIDLY, AND SO ARE WE

AVAILABLE HYBRID / ELECTRIC CATEGORIES

- Clutchless scroll design new compressors for EVs
 - Coverage includes Ford, Lincoln, Mercury, Toyota, Lexus, Hyundai, and Kia applications
- A/C Installer Kits available to accompany EV compressor replacement

ADDITIONAL KEY COMPONENTS

- Complete A/C Kits
- Expansion Devices
- IHX Hose Assemblies
- Specialty Chemicals
- Receiver Driers
- Brushless Blower Motors
- Coolant Pumps
- Electric Heater Valves
- Air Door Actuators
- Switches & Relays
- Evaporators

TEMPERATURE CONTROL FOCUS CATEGORIES

New and Reman Compressors

Cooling Depot™ engineers and manufactures the widest range of Compressors in the aftermarket

Our engineering and validation processes simulate a real world environment equivalent to 160,000 kilometres (100,000 miles). Every Compressor is 100% vacuum and leak tested

100% of our remanufactured Compressors are produced in North America

Accumulators / Filter Driers

Manufactured with state-of-the-art production equipment for product integrity and quality

Precision-machined fittings for a proper fit

Manufactured in our IATF-16949:2016-certified facility with premium desiccant bags heat-sealed for long-lasting performance

Expansion Devices

All expansion devices are specifically calibrated to provide proper refrigerant flow

Cooling Depot™ ensures each Expansion Valve matches OE specifications for optimum cooling performance

Block Valves are designed using advanced software and precise measuring equipment to ensure product quality and consistency

Hose Assemblies

Basic manufacturer of Hose Assemblies to provide a unit that matches OE fit, form and function

Cooling Depot™ offers industry-leading coverage for over 94 million* vehicles

Constructed with double-wall barrier hose and are helium tested for leak-free performance

TEMPERATURE CONTROL FOCUS CATEGORIES

Evaporators

Made of high-grade aluminum to resist corrosion

All Evaporators are pressure tested for peak performance and trouble-free operation

All Evaporators are direct OE replacements and meet or exceed OE fit, form and function

Optimized for proper refrigerant flow and pressure drop

Blend / Air Door Actuators

Air Door Actuators are a key component in driving comfort and HVAC ventilation

Made from quality materials, precision gears and quality soldered connections

Air Door Actuators undergo rigorous testing to ensure OE fit and long-lasting performance

Blower Motors / Brushless Motors

The complete Cooling Depot™ program features over 780 Blower Motors, including Brushless Motors covering 240 million* vehicles

Each model is 100% tested for performance, durability, vibration and operational noise

Critical components for cabin comfort and proper HVAC system operation

Fan Clutches

Cooling Depot's™ comprehensive Fan Clutch program includes over 245 thermal, non-thermal and electronic clutches covering 70 million* vehicles

Each unit is designed as a true quality replacement in fit, form and function to meet or exceed OE specifications and durability

Critical component of the cooling system that varies the fan speed to meet the cooling demands of the vehicle

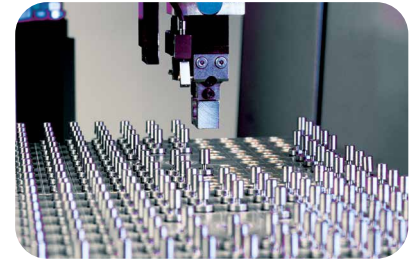

* North American VIO

STABILITY MATTERS.

In today's world of ever-changing trade guidelines and supply chain disruptions, stability matters more than ever. Consistent leadership, 100+ years of experience and a large North American manufacturing footprint make SMP your stable, full-line supplier.

North American Manufacturing

Multiple manufacturing facilities in Canada, the US and Mexico help mitigate the effect of tariffs.

Strategically Located DCs

Multiple US distribution points and in-country distribution for Canada and Mexico ensure consistent supply in the event of local disasters or weather.

Professional Technician Training

The industry's most awarded training program keeps your customers up to date on the latest vehicle technologies and can help reduce warranty claims.

Category Insights and Analytics

Robust data and analytics will help make sure you have the right applications in growing categories and the right related components in legacy categories.

Dedicated Sales Force

Factory-trained, direct sales force helps keep your employees informed on the latest vehicle technologies and creates pull-through demand from professional customers.

Powerful Performance

TECH SELECT A/C KITS

Don't risk your reputation and profitability by replacing just the compressor.

Air conditioning performance is dependent on all system components performing efficiently.

• 8,412 New and Reman 'Main' Component Kits

Component kit includes: compressor, receiver/drier and expansion device

• Single Part Scheme

Virtual ordering number

• WHI catalogue accessibility

- Improved admin functionality and discounting price
- Relieve store/WD inventory

• Available through EPICOR

• Doing A/C service requires more than just replacing the compressor

- Replace the accumulator/filter drier
- Replace the orifice tube or service the expansion valve
- Flush the system with a flush solvent designed for automotive air conditioning
- Add the correct amount of new compressor oil

Driven Program

COOLING DEPOT™ PROGRAM

The Cooling Depot™ program is a powerful way to create awareness and reinforce your business as the Cooling Depot™ in your market. The strategic focus on Cooling Depot™ is the essence of what the Cooling Depot™ brand is all about - integrity, quality, reliability, peace of mind and trust.

As a participant in the Cooling Depot™ program, you will benefit from the program support, product and marketing expertise that will allow you to capitalize on the growth opportunities for Cooling Depot™ maintenance and service.

The Cooling Depot™ program - it's everything you need to optimize the performance of your business.
